

Calderdale Council Transportation team and Active Calderdale have been working with schools to help pupils safely return to school and be more active on their journey.

Since Monday 15 June, 10 Calderdale schools have taken part in School Streets trial measures, during this time, the streets have been transformed into safer spaces for all at school drop-off and pick-up times.

This work supports the Council's Vision 2024 for Calderdale by aiming to tackle the climate emergency, improve air quality and become the most active borough in the North by 2024 through the Active Calderdale movement.

Can you please help us to see how the School Streets have affected you by completing this short survey?
