**Re: Contingency Planning for Remote Learning or if a bubble needs to close**

Dear parent/carer,

I'm writing to remind you about a letter which was sent in September, and to keep you updated on the plans in place should your child need to access their learning remotely. Whilst attendance at school is compulsory for all children of statutory school age, there are clear guidelines about when a child must stay at home to reduce the transmission of the Coronavirus – in the event of this, we have plans to ensure as little disruption to their learning as possible.

Each week, your child's class teacher is making their lessons and resources available on the platform **Microsoft Teams**. An overview of the week is provided for parents, detailing what your child's class will be covering in lessons that week and directing your child to the necessary resources for them to complete the learning at home.

**Access**

Your child will have their login details recorded in their planner and will have been shown by their class teacher how to access their **Microsoft Office 365** account.

**Logging on**

We recognise that children need to be familiar with how to use their account and access the relevant learning and resources, so each week your child completes one of their classroom activities and one of their homework activities on **Microsoft Teams**.

**Weekly overview**

A Word document will be uploaded to the files section of your child's **Microsoft Teams** account each week, outlining the learning objectives and planned activities for each lesson that week. There are a few sections to this document that I will explain now:

*Overview grid*

The coloured table lets you know which lessons are planned for each day of the week, with an idea of how long the activity could last, what the children will be learning and how they will be record this. Please note, the timings are approximate, so if something is taking longer at home than suggested on the overview document, don't worry! Where a lesson has a grey box, this reflects the timetable of the children learning in school and that subject will not be covered that day.

*Homework*

Your child will be set weekly homework for maths, reading, spelling and history/geography. We ask that all homework is documented in your child's planner and parents/carers continue to sign these

**Akroydon Primary Academy, Rawson Street North, Halifax, HX3 6PU**

**web: [www.akroydon.trinitymat.org](http://www.akroydon.trinitymat.org)**

each week. Class teachers will check this on your child's return to school.

*Weekly Learning Challenge*

Each week, your child's class teacher will set a learning challenge in subjects such as art, design technology and music. These challenges are optional activities to be completed at home, but please do share any photos of these projects with us by sending them to your child's class email account.

**Additional support**

We also have individual class email accounts active for this academic year. Should you need to contact your child's class teacher for any further guidance or support, please don't hesitate to use this facility to get in touch.

Thank you for your continued support,

Yours sincerely,

Annie McNally

Principal
