

13 April 2021

Dear Parent/Carer

Year 5 Science

As part of our school's Science Curriculum, this term, your child will complete the unit; 'Growing up, Growing old.'

This unit is split up into 5 sections:

- Pregnancy and Gestation Period.
- Babies, Toddlers and Childhood
- Adolescence and Puberty
- Adulthood and Old Age.

It is designed to educate children on the human life cycle and the physical changes that occur during each life stage. We wanted to take this opportunity to inform parents that these lessons were taking place so that the children could talk to you about this if they feel they need to. The language used in the lessons will all be scientifically accurate and we will encourage the children to use these terms when discussing the above sections.

In preparation for these lessons, please send your child in with a baby and/or toddler photograph to use in our science lessons. These can also be emailed into their class email accounts at maple@akroydon.trinitymat.org or oak@akroydon.trinitymat.org.

If you have any further questions, please do not hesitate to contact your class teacher.

Many thanks for your ongoing support.

Yours sincerely,

Mr A Severn
Year 5 Class Teacher
Assistant Principal
